#### **DETAILED ACTION**

### Information Disclosure Statement

The information disclosure statement filed December 17, 2004 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered. Specifically, only the front page of the WIPO document was included.

## **Drawings**

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the severing of the web around each of the pavement elements must be shown or the feature canceled from the claims. No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the

Art Unit: 3671

drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

#### Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-7, 9-11 and 15-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Clark et al. (U.S. Patent 5,853,846) in view of Szekely (U.S. Patent 5,775,835) and Lee (U.S. Patent 1,746,312). Clark et al. discloses forming an array of magnetic pavement elements (6) interconnected by a carrier web (4, 12, 21). The connection between elements (Figure 5, for example) is frangible; however, Clark et al. does not specifically teach the severing of the web around a perimeter of the elements. Szekely teaches severing around a perimeter of paving elements in order to utilize different sizes as required by the application (column 4, lines 9-13). Lee shows an application of pavement elements in which the elements are separately placed along a pavement surface (Figure 1). It would have been obvious to one of ordinary skill in the art at the time the invention was made to have severed, as taught by Szekely, around a perimeter

Art Unit: 3671

of each of the elements of Clark et al. in order to obtain sizes suited for placing them in the configuration of Lee.

The configurations of webs (4, 12, 21) meet the recitations of claims 2-4.

The magnetic particles (6) are distributed in a binder (4).

There is an alternating polarity.

The adhesive (8) is optionally pressure sensitive, and there is a liner (10) covering the adhesive.

Regarding claim 9, webs 4 and 12 are polymeric materials and web 21 is a non-woven web.

The elements are adhered to a pavement surface.

The elements are formed in a predetermined pattern.

The web meets the recitation of extensible carrier web.

## Response to Arguments

Applicant's arguments filed December 17, 2004 have been considered but are moot in view of the new ground(s) of rejection.

#### Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gary Hartmann whose telephone number is 703-305-4549. The examiner can normally be reached on Monday through Thursday, 9am-7pm.

Art Unit: 3671

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas Will can be reached on 703-308-3870. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
